Autocorrelation, also known as serial correlation, is the correlation of a signal with a delayed copy of itself as a function of delay. Informally, it is the similarity between observations as a function of the time lag between them. The analysis of autocorrelation is a mathematical tool for finding repeating patterns, such as the presence of a periodic signal obscured by noise, or identifying ...

The scope of this presentation is to analyze the stock data of the companies that are frequent investors in Super Bowl ads. This is done by first finding the top investing sectors and then listing the companies in those sectors that have aired their commercials multiple times during the Super Bowl in the last five years.

## Proceedings - SAS Global Forum | SAS

In Introductory Econometrics (Woolridge, 2009 edition page 268) this question is addressed. Woolridge says that when using robust standard errors, the t-statistics obtained only have distributions which are similar to the exact t-distributions if the sample size is large.
